## LANGUAGES

- Spanish
- English (Intermediate)

## SKILLS

- Web Development
- UI/UX
- Databases
- Testing
- Git
- Firebase
- Jira
- .NET
- Angular
- Clean code
- Scrum
- Teamwork

## EXPERIENCE

I developed various web projects at the University, using different languages and technologies, working with agile methodology (SCRUM) and carrying out exhaustive tests, both functional and non-functional. Some of the projects:

### Financial Projections Web App

- Contributed to the development of a web application for financial projections targeting SMEs, using **.NET framework, Entity Framework, Blazor** and a **Microsoft SQL Server** database. [Github repository](#)

### RIDE - Online Food Delivery Platform

- Contributed to the development RIDE, an online food delivery platform connecting users with local restaurants, set to be released on the Google Play Store. Implemented with **Angular, Typescript**, and **Firebase**.

### "De FERIA" Web App

- Contributed to the development of "De FERIA," a web application facilitating the location of farmer's markets throughout Costa Rica. The project, built in **Python** with the **Django** framework and backed by a **PostgreSQL** database, focused on providing users with an intuitive and efficient experience. <https://deferia.cr/>

### Calendar Application

- Developed a calendar application with a front-end created using the **React framework** and a **REST API** with **Node.js** and **Express**. The application allows **CRUD** operations on a **MongoDB** database. <https://calendarapp.fly.dev/>
